EXPERIENCE

Full Stack Developer

@Paragon M&M

12/2017 - 05/2019

Athens, Greece

Laravel · Bootstrap

- Developed full stack Laravel applications — including a Municipality Report System and an Artist Social Platform — with authentication and role-based access control (RBAC).

Web Developer

@DigitalUP

05/2019 - 04/2021

Athens, Greece

WooCommerce · Magento2

- Developed and maintained e-commerce stores, handling custom theming and feature development, payment integrations, and ongoing client support.

Full Stack Developer

@DigitalWise

04/2021 - 04/2022

Athens, Greece

Laravel · REST APIs · NuxtJS · TailwindCSS

- Built a multi-vendor marketplace with a Laravel REST API and Nuxt SPA, handling complex domain logic around vendor management, product catalogues, and order flows.

Software Engineer

@instacar

04/2022 - 09/2024

Athens, Greece

Golang · Laravel · REST APIs · DDD · AWS · VivaPayments · OpenAI

- Developed and maintained a Golang fleet management backend system using Domain-Driven Design, covering user management, subscriptions, and payments.
- Architected a Laravel microservice for asynchronous email delivery and PDF generation.
- Integrated third-party services including Trello, VivaPayments, and OpenAI to extend platform capabilities.
- Managed AWS infrastructure including S3 for storage, SQS for messaging, and CloudSearch search functionality.

Backend Engineer

@WithPlum

09/2024 - Present

Athens, Greece

Python · Flask · FastAPI · SQLAlchemy · GCP · Grafana · Sentry · RabbitMQ

- Designed and developed subscription plan infrastructure across UK and EU markets, enforcing plan-based access control to gate product offerings per customer tier.
- Maintained and improved billing modules and microservices, using feature flags for gradual rollouts to minimize risk on high-stakes financial flows.
- Led the Perks system end-to-end from concept to production, delivering in-app rewards tied to subscription tiers to boost user retention.
- Built and maintained services following a layered architecture, leveraging RabbitMQ for async messaging and ensuring reliability through unit and integration testing.
- Maintained platform observability using Grafana and Sentry, monitoring system health and proactively resolving issues in production.
